[More News from MAR Systems](#)

Dear Friend,

Following the success of our first e-newsletter in November, we're reaching out to you to share the latest information on our clean water technology.

As we close out a successful 2009, we're looking forward to an even more prosperous 2010. We will continue production of our [Sorbster Hg](#) and [Sorbster As](#) media, deploy our [Mobile Development Unit](#) and [test your water in our lab](#) for the best media solution.

As you can see, we've been attending conferences, leading discussions and educating policymakers, EPA representatives and industry experts about our FASTER, CHEAPER, GREENER water treatment solution.

Thank you for your continued interest in MAR Systems. Have a wonderful holiday season!

Please share this e-newsletter with your contacts, and feel free to contact us at [info@marsystemslc.com](mailto:info@marsystemslc.com).

## MAR Systems: Where You've Seen Us

**Conferences. National Summits. In the News.**

Representatives from MAR Systems attended the [Great Lakes Water Conference](#) in Toledo, Ohio and the [Mercury Science and Policy Conference](#) in Chicago. MAR Systems' Sorbster Hg media, which addresses your legacy issues, compliance concerns and complicated contamination issues is proving itself to be the most cost-effective solution with tests that demonstrate success 20,000 times faster than competitors.

MAR Systems founder, Claude Kennard (left) with Jumpstart CEO Ray Leach at the Jumpstart's [Minority Business Early-Stage Capital Summit](#). Claude was a panelist along with other successful entrepreneurs and venture capitalists.

[Click here](#) to read Richard Stuebi's blog about the importance of removing mercury from water and how MAR Systems is addressing the conflict between industry and the environment.

Finally, MAR Systems was featured in [Jumpstart Connect](#). Click on the company profile to view a video with MAR Systems' CEO Tony Lammers.

## Send Us Your Water

### Sorbster Media Optimization Selection

As a precursor to pilot-scale field work or long-term treatment solutions, MAR Systems offers an initial treatability study to find the best media solution for your water.

## Meet the Newest Members of MAR Systems

**Gina Sacco - Senior Chemist** - Gina's primary responsibilities for MAR Systems are new product development, research and quality control. Prior to joining MAR Systems, Gina was a laboratory coordinator and environmental assistant for Thomas Steel Strip Corp. in Warren, Ohio. Gina received her bachelor's in combined science from Youngstown State University.

**Becky Unkefer - Lab Technician** - Becky is responsible for testing water samples at MAR Systems and determining the right media solution for client's water samples. She received her bachelor's in chemistry from Mt. Union College. - *Photo by Tracy Boulian, Cleveland Plain Dealer*

**Eileen Russell - Intern** - Eileen is a biochemistry major at Hiram College and will be completing a competitive analysis of media technologies, including MAR Systems' Sorbster media. Eileen will complete the bench work with guidance from MAR Systems management.
